Andi:

We're expecting a news release shortly that may answer several of your questions so will add your name to that distribution list.

I'll also attempt to point you to answer s those questions I can since you have such a quick turn-around:

How's it affecting drinking water? <http://www2.epa.gov/goldkingmine/roles-epa-and-other-responders-after-2015-gold-king-mine-release>

Should people going down there be worried? Pending press release should answer this question

Is a clean-up going to happen or will it just dilute? <http://www2.epa.gov/goldkingmine/press-releases-and-updates-gold-king-mine-response>

Are the fish in Lake Powell going to be good to eat? *I believe the administrator touched on this in her remarks but am not 100% positive.*

<http://www2.epa.gov/goldkingmine/audio-administrator-mccarthys-press-conference-durango-co-8122015>

<http://www2.epa.gov/goldkingmine/audio-administrator-mccarthys-press-conference-farmington-nm-8132015>

How long should we be worried about the water in Lake Powell? *See remarks above.*

If you still have questions after checking out these sources, please let me know and I'll elevate to the Area Command.

Hello,

I just spoke with you on the phone and I have a couple of questions relating to the gold king mine emergency.

Has the contamination reached Lake Powell in Utah?

If it has:

How's it affecting drinking water?

Should people going down there be worried?

Is a clean-up going to happen or will it just dilute?

Are the fish in Lake Powell going to be good to eat?

How long should we be worried about the water in Lake Powell?

Thanks!
